Our AI Fashion Solutions department is at the forefront of developing state-of-the-art AI solutions for some of BESTSELLER's most strategically important projects. Across our teams, we work on a variety of projects ranging from demand planning to recommendations. Our work has a high focus on delivering value to our brands and we are working in a hypothesis-driven manner to always test out ideas and directly measure the impact of our solutions.

YOUR JOB

As our new Data Scientist, you'll be part of shaping AI-powered experiences across BESTSELLER's wholesale landscape.

Your key responsibilities will include:

- Developing and implementing advanced machine learning models for fashion recommendations, demand forecasting or logistics optimisation solutions.
- Analysing large datasets to extract meaningful insights and inform business strategies.
- Collaborating with cross-functional teams to understand business needs and deliver effective AI solutions.
- Continuously researching and staying updated on the latest AI and machine learning technologies relevant to fashion recommendations.
- Presenting complex data and results in a clear and understandable manner to stakeholders.

Your Benefits

This is your chance to be at the forefront of developing AI products and drive the data discipline in the next phase of our AI journey.

You will experience:

- An organisation that is on the forefront of working agile to drive innovation and deliver high-quality solutions efficiently.
- A manager who has great confidence and trust in you and supports your professional growth and development.

YOUR PROFILE

If you're passionate about creating value from machine learning applications, we'd love to hear from you. We're looking for someone with strong communications skills, excellent problem-solving abilities, and great attention to details.

Other qualifications to succeed in the role is:

- A master's degree or Ph.D. in Data Science, Computer Science, Statistics, Mathematics or a related field.
- 2-4 years of experience as a Data Scientist or Machine Learning Engineer.
- Proven experience in machine learning, predictive modelling, and data analysis.
- Strong programming skills in Python and experience in Databricks.
- Excellent communication skills in English, both verbal and written.

WE LOOK FORWARD TO HEARING FROM YOU

If you have questions about the position, you are welcome to reach out to Jakob Blaavand on +45 21 68 49 41. Otherwise, please send your application and CV as soon as possible, and no later than 27 November 2025. We review applications on an ongoing basis and reserve the right to take down the ad when we find the right candidate.

WORK LOCATION: Aarhus, Denmark.
